

GULFSOUTH SPAS

COLLECTION
OF SPAS

About our Spas

Aqua Master carries a wide range of spas for relaxing at home. Re-energize yourself, relax to the max and enjoy a wellness break in your GulfSouth Spa, no matter what time of year.

We offer 4 different series of spas.

The Coastal Series, Nautical Series and Trident Series

Include a range of residential spas available in different sizes and colors and perfect for unwinding. Featuring jets, fountains and LED Lighting, they have a calming effect and leave you feeling relaxed.

Swim Series

Our sport series provides a unique experience equipped with a rowing exerciser, a water purifier, a built-in sound system (on 3 out of 5 models) and more, our spas let you work out from home in utter carefree comfort. Our quality training spas are sure to please!

GULFSOUTH SPAS 4 SEASONS OF BENEFITS

Taking a spa is enjoyable all year round, but it's even more so in the winter. There is nothing better than enjoying warm and relaxing water to forget the inconveniences of the cold season and appreciate its beauty.

The special insulation of GulfSouth Spas allows the water to remain at a high temperature even in the coldest weather. Whether you want to spice up an evening with friends, relax, or relieve your joint and muscle pain you can enjoy the benefits of Hydrotherapy 365 days a year.

- Heat-Shield RMAX™ Insulation System,
- Multi-Layered fiberglass spa shell,
- Foil faced RMAX™ Foam Panels.
- * Maintenance free Confer Skirting.
- ABS Permanent Bottom.
- Floor entirely covered with heat reflecting bubble insulation.
- Heated airspace.
- Up to 7 times the R-value of competing models, additional protection from freezing. Unique design protects equipment and allows easy access for maintenance and additional options.
- Acts as a sound barrier.

GulfSouth Spas goes through a series of testing for the heat-shield name. We test the water temperature and regulate the process of heating, GulfSouth Spas has its own Research and Development lab, to ensure your GulfSouth Spas will keep you relaxed for years to come.

ANATOMY OF GULFSOUTH SPA

The number of jets is not as important of the placement of the Jets.

1. Topside Control
2. Built-in Filtration Cartridge
3. Safe Entrance Steps and Child Seat
4. Waterfall Features on Select Models
5. Trapezius and Cervical Station.
6. Sciatic Nerve
7. Zero Gravity Lounge Chair
8. Reflexology Diffuser

HYDROTHERAPY - JET SYSTEM

The oversized jets and the fusion of air and water double the force of the jet to offer a more complete massage.

Jet placement targets major muscle groups for fast pain and muscle relief.

Independently adjustable, screw-in jets allow you to customize the jet action.

Divertor controls allow the user to adjust the amount of water pressure to each seat.

Featured jets are not in every spa. Jet sizes, styles and colors may vary.

Balneotherapy

in the comfort of your own yard.

20 minutes a day. 3 Times a week. That's all.

To quickly feel the benefits of balneotherapy on your health, soak in your spa for 30 minutes a day, 3 times a week. By combining your seasons with a healthy diet and physical activity, you will quickly see noticeable positive effects on your daily well-being.

BALNEOTHERAPY

Taking a spa is enjoyable all year round, but it's even more so in the winter. There is nothing better than enjoying warm and relaxing water to forget the inconveniences of the cold season and appreciate its beauty,

1. Helps with relaxation and stress management
2. Relieves backaches and lumbar pain
3. Soothes joint and muscle pain
4. Promotes sleep
5. Improves cardiovascular health

All of these benefits, and many more, are now well documented. Find out more in the following pages.

RELAXATION AND STRESS MANAGEMENT

Did you know that to manage stress, medical students from many universities are required to take meditation classes? Moments of relaxation in the comfort of a spa produce physiological effects comparable to these meditative sessions: the mere act of soaking in hot water can help manage stress, and even improve cognitive performance.

Spending time in a spa influences brain functions, generating physiological effects comparable to those brought on by meditation. This is what a study published in the International Journal of Aquatic Research and Education suggests¹. It reports that a 20-minute immersion in hot water causes the autonomic nervous system to adjust, just as meditation does. This reaction promotes short-term memory, increases attention span, and improves brain functions that allow for the proper processing of information.

The mere fact of being immersed in a spa could influence the sympathovagal balance of the body. In short, this activity leads to a decrease in anxiety and stress, and generates positive ideas while lowering blood pressure and cardiac stress.

BACKACHES AND LUMBAR PAIN

The lower back and pelvis perform a colossal task: they alone support two thirds of our body weight. When your back hurts, the whole body is affected. According to data collected by United States Statistics 75% to 80% of people will experience at least one serious back pain episode or other back aches during their lifetime. As part of a study published in the Journal of Rheumatology⁴, patients with chronic back pain combined sessions in hot water basins with their medication. After 3 weeks, their pain had decreased significantly, and their backs had become more flexible.

After 6 months, these patients were able to reduce their medication intake. With its heat and massage jets, a spa can thus become a very effective everyday back pain management method.

American doctors from the Spine-Health.com organization claim that spending time in a spa is recommended for controlling back pain. It promotes blood circulation to the muscles and increases overall body flexibility.

JOINT AND MUSCLE PAIN

Many sportsmen and outdoor enthusiasts will tell you that after physical exertion, a spa is a great reward. Beyond relaxation, the soothing effects of a spa can make a major difference when pain remains persistent. There is evidence that, in addition to soothing aching muscles, hot water and massage jets also have the potential to soothe some chronic pain, such as pain caused by osteoarthritis.

According to a study published in the *Journal of Physical Therapy Science*⁶, patients experienced a significant easing of their osteoarthritic knee pain after spending time in a spa. The combination of immersion in hot water and hydro massage helps trigger calming mechanisms for joint pain.

Immersion in a spa may also soothe the pain caused by physical exertion. According to the Rochester University Medical Center, immersion in hot water dilates blood vessels, increases the supply of oxygen and nutrients, and thus relaxes muscles, ligaments and tendons. Moreover, according to a study by the European Journal of Applied Physiology, massage jets located in the spa could facilitate recovery after an intense physical effort, by releasing toxins from the muscles into the blood stream.

PRESSURE POINTS OF BALNEOTHERAPY JETS

- 1. Headaches
- 2. Shoulders and Rotators
- 3. Elbow Injuries
- 4. Lower-back pain
- 5. Sciatic Pain
- 6. Carpal Tunnel Syndrome
- 7. Knee Ache
- 8. Calf Pain and Blood Circulation Issues.
- 9. Heel and Foot Arch Pain

POSITIVE EFFECTS ON SLEEP PATTERNS

Sleeping well is not a luxury: sleep disorders have a major impact on everyday health. According to an article in the Canadian Sleep Society's journal Insomnia Round, sleeping less than 6 hours a night can affect the brain's ability to plan, organize, be attentive, and develop strategies. About 40% of North Americans suffer from insomnia symptoms at different times of their lives. Spending time in a spa can be just what is needed. In addition to relaxation, there is evidence that an early evening spa session improves the length and quality of sleep.

In a study published in the scientific journal *Sleep*, researchers have found that immersion in hot water for 30 minutes, a few hours before going to bed, contributes to better quality sleep. Body temperature increases in the spa, then slowly decreases in the evening. This regulation helps to fall asleep faster, but also increases the quality of slow/deep sleep during the night, which are critical periods when the body regenerates. Therefore, in order to sleep well, a good soak in a spa is recommended. In addition to promoting relaxation, it can also improve the length and quality of sleep.

Adults need to sleep on average 8 hours per night. Besides fatigue and sleepiness, extended lack of sleep is associated with serious health problems such as depression and weight gain.

CARDIOVASCULAR HEALTH

Nothing can replace a healthy and active lifestyle, but sometimes health issues or overly busy days can put a considerable strain on the body, and moments spent relaxing in a spa can be beneficial. They may even have positive effects on your cardiovascular health (with prior approval from your doctor) if you have heart problems or suffer from high blood pressure. According to Dr. Thomas G. Allison, taking a relaxing break in the warm water of a spa may indeed be good for your heart, as the spa may simulate some aspects of exercise without the associated heart stress. A 10-minute hot bath may even be beneficial for people suffering from congestive heart failure.

In terms of heart health, sitting in hot water may also offer some of the same benefits as meditation. As part of a recently published study in the International Journal of Aquatic Research and Education, this phenomenon has been documented in participants who received 24-minute hot water sessions. The findings of this study show direct effects on the sympathovagal balance when the body is immersed in hot water. Specifically, in addition to the benefits to brain activity, this phenomenon may bring a decrease in blood pressure, cardiac irritability, and anxiety.

REFLEX ZONE MAP

THE BENEFITS OF REFLEXOLOGY

In traditional Chinese medicine, reflexology has the ability to prevent a lot of health-related problems. The beneficial effects of jet impulses on the plantar surface of the foot are attributable to the stimulation of specific reflex zones.

In reflexology, the foot is divided into numerous reflex zones, each corresponding to a specific part of the human body. Reflexology consists of manipulating these zones to locate and alleviate tension and dysfunction, thus restoring the body's natural balance.

Our *Coastal Series*, If you are dreaming of buying an affordable spa? The Coastal Series therapeutic spas are a great choice. This Sterling series is perfect for families looking to buy their first spa at a good price. It also features a smaller spa for tighter spaces or urban setting.

COASTAL SERIES

Our *Nautical Series +*, this Series is a even more soothing relaxation. Our Sterling Series+ is a deeper (39") version for the most discerning spa owners crave. The Nautical Series + will bring a sense of beauty to your backyard and sense of serenity to your life.

NAUTICAL SERIES

Our *Trident Series*, has all the comfort and options you would like in your backyard, with all options to upgrade included to further complete your relaxation experience. Your GulfSouth Spa is built to suit your needs and desires for everything from entertaining friends and family to you.

TRIDENT SERIES

Our *Swim Series*, aquatic exercising swim spa is quickly gaining popularity. As opposed to other swim spas. With the Swim Series adjust the water flow, which is ideal for low-impact jogging / treading. Stainless steel handles provide additional support.

WORK - OUT

The perfect balance of art and technology now with an Olympic level training program for swim spas. With its swim spa training program, in.k1000+ can transform any swim spa into the ultimate training machine. Directly on the keypad, training sessions can be customized by setting flow intensities, durations and color indicators. Pre-sets Lap, Transition, Cardio and Power drills can also be selected and customized to match any training needs. in.k1000+ can now control multiple 2 speed pumps and synchronize the jets to create the wide selection of water stream strengths a swimmer needs for serious training.

Swim Coach

SWIM COACH™ - PROGRAMMABLE WORK-OUT SYSTEM

5 pre-programmed drills are readily available for you to choose from. Select the one that fits your training needs. Our Power drill improves your overall swim performance. Selecting transition drill allows you to switch between butterfly, backstroke and breast stroke to improve technique and solicit separate muscles. The Cardio drill is a fast-paced, heart-pumping exercise plan that burns calories and builds muscle. Choosing Lap drill alternates high-intensity periods with low-intensity recovery periods for quick calorie burning. The Endurance drill allows you to concentrate on technique and consistency.

Select drills, set durations, intensities and more with the touch of a finger on an interface designed for swimmers.

Many parameters can be configured to fit your training habits; warm up, cool down, step time, preparation time and lighting.

You can customize your training session. It's as easy as dragging your finger on the screen to draw the pattern of your choice and save it under your name.

The in.k506 is built with all the great features you've come to love in the in.k800, but in a smaller package. It is discreet, compact, and unobtrusively beautiful. Save space without losing out on function.

K506 - is standard on the Coastal Series CS5L, CS6.1L, CS6.2L, CS6.1, CS6.2, and CS7L

High - End COMPONENTS

At GulfSouth Spa we have a knowledgeable Engineering Department, that thrives to bring the consumer the very best up to date equipment available.

Our research and development team is award winning and works closely with our high end suppliers to get the most performance in the system development of our GulfSouth Spas. At GulfSouth Spas our success only works if our end customers are truly happy and worry-free.

Engineering Features

IN.YE - CONTROL SYSTEM

IN.YE control systems are designed to fit in perfectly and to be easily installed, powered, and connected to pumps and accessories of spas of all sizes and configurations. IN.YE control systems deliver optimal performance and total control, giving spa owners the immediate satisfaction of getting a lot more than what they expected from their spas. Offers a full range of configurations and fully powers all the equipment and accessories of your spa.

OVERSIZED PUMP SYSTEM

Energy efficient on both high and low speeds with 56 frame design. Installed on an anti-vibration and noise reducing pad.

SUPERIOR BOND - DOUBLE PROTECTION

Glued and clamped fittings ensure in an extra secure bond between pipes and jets.

OZONE GENERATING SYSTEM

All our spas are equipped with an ozone treatment system. Odorless and nonirritating to the skin and eyes, ozone is a powerful purifier. It simplifies your spa maintenance and reduces the amount of chemicals needed. It is effective against bacteria, algae, and organic pollutants. In addition, it stabilizes the pH level and helps increase the life of your equipment. For soft and clear water.

Insulation SYSTEM

For more than 35 years, RMAX has been creating insulation solutions based on the latest building science. The RMAX Insulation is high-quality, polyiso-based wall and specialty insulation products for GulfSouth Spas deliver maximum R-values and minimum environmental impact with efficiency in installation, cost and design.

RMAX's engineered products and solutions allow for ultimate efficiency through multiple design options, creating ease of construction and reduced energy usage. This leads to a better building envelope while adding to the bottom-line through both material and labor savings - making RMAX an excellent choice GulfSouth Spas.

Rmax® Insulation

HEATSHIELD INSULATION SYSTEM

- Up To 7 Times The R-value of other hot tubs on the market.
- Acts as sound barrier
- Added protection against freezing
- The unique design protects equipment,
- Allows easy access for service and upgrading

Reinforced

FINISH

Vinyl ester resin falls between the polyester and epoxy resin when it comes to different characteristics and cost. It has a longer molecular chain than polyester resin which helps it absorb impact better than polyester and it shrinks less. There is also less chance of de-lamination when using VE resin. Vinyl ester can be used as a final coat after polyester resin to create a better water barrier.

Vinyl Ester resin is also more resistant to solvents and water degradation. It is typically used in GulfSouth Spas.

Strong Structure

FRAMING

Quality pressure-treated wood structure (50-year life expectancy, meets environmental standards). Removable side panels. Anti-moisture ABS plastic base for increased stability and heat retention. Base and frame with ThermoFoil™ protection. Frame is bonded to shell.

DYNACRETE™ BASE

Made of recycled acrylic and resin. Isolates frame bottom from moisture. The structure's flat base prevents the creation of air pockets, thus ensuring increased stability and foot support rigidity. The most durable and solid spas in the industry.

REINFORCED FINISH

Lucite® Cast Acrylic and reinforced fiberglass finish to ensure strength and durability. Hand rolled process eliminates air pockets which can cause separation

Energy

EFFICIENT

Why You Need a Cover for Your GulfSouth Spa. A good spa cover completely seals your hot tub or all-season pool, providing a stable and secure barrier between it and the surrounding environment.

There are several reasons why this is important:

- It locks the heat in so the water stays at a constant temperature, making it easy to take a dip at a moment's notice.
- It improves the energy efficiency of your spa and lowers your energy bill.
- It offers protection against the elements, including wind, rain, and the sun's UV rays.
- It keeps debris from falling into the water.

GulfSouth Spas function best when they aren't constantly being turned off and on. It's good practice to keep the water heated and circulating all the time so that your water getaway is available whenever you want to use it (this also encourages you to make use of it more often) and it's actually more energy-efficient than switching it on only when you want to use it.

A spa cover helps keep things in this desirable "ready to go" state while also keeping dirt, leaves, and critters from getting inside and creating a mess.

Double Sewn, Hand Grips Provide superior durability and an extra level of comfort.

Insulated Heat Bags Helps to eliminate heat loss between the cover fold when spa is not in use.

4 Child Resistant Locking Mechanisms Fasten to each corner of the spa, providing that extra peace of mind.

Sealed Interior Hexene Poly Bag Protects inner foam core by reducing sweating and moisture.

GulfSouth Spas recommends that you keep your cover on and locked when spa is not in use!

Warranty

REST ASSURED SPA AND SWIM SPA WARRANTY

YEAR

20

WARRANTY

Twenty Year Shell Structure Warranty GulfSouth Spas warrants the spa shell against loss of water caused by defects in materials and/or workmanship for a period of **TWENTY YEARS** from the original date of purchase.

YEAR

5

WARRANTY

Five Year Plumbing Warranty

GulfSouth Spas warrants all plumbing parts to be free from defects in material and/or workmanship for a period of **THREE YEARS** from the original date of purchase, as long as the spa is owned by the original purchaser. Years four and five will be prorated to 50% of replacement cost of components and labor. Further, this Limited Warranty specifically covers leaks from the wall fittings, jet fittings, internal plumbing, internal glue joints, freeze drains and all bonded parts, including the filter compartment and light lens. Damage resulting from failure to properly winterize the spa prior to freezing weather, or failure to properly winterize the spa after a component failure, is not covered under this Limited Warranty.

YEAR

1

WARRANTY

One Year - Other Warranty

See GulfSouth Spas Limited Warranty for additional information

YEAR

5

WARRANTY

GulfSouth Spas warrants the electrical equipment components - specifically the control system (pack and topside), pumps, heaters, and air blowers against malfunction/or defects in materials and/or workmanship for a period of **THREE YEARS** from the original date of purchase, to the original owner only. Years four and five will be prorated to 50% of replacement cost of components and labor. This Limited Warranty does not apply if the failure is caused by or contributed to by any of the following: improper wiring, use of extension cords, improper alterations or modifications, or failure to plug into isolated service, as indicated by the manufacturer's specifications. Further, this Limited Warranty follows the guidelines of the original equipment manufacturers. The labor coverage is an extended warranty program maintained by Guldsouth Spas on your behalf. Your dealer or authorized repair facility has details and procedures for submitting warranty claims.

Spa Safety

- Maintain constant adult supervision when children are in or near ANY body of water.
- Install fences, barriers and spa covers to prevent unsupervised access, especially by young children.
- Always completely remove your spa cover before using your spa.
- Inspect your spa equipment on a regular basis to ensure that it is in good working order and that it is safe.
- Always test the temperature of your spa's water before entering the spa. It is recommended that maximum water temperature never exceed 104°F (40°C). Do not soak for more than 15 minutes at one sitting in 104°F (40°C) water.
- Individuals with certain medical conditions, such as heart disease, diabetes, high or low blood pressure, and pregnant women, should not use a spa without advance approval by their physician. If a person has any doubt as to whether a medical condition should limit their use of a spa, they should seek prior consultation with their physician. Individuals with open cuts or wounds should not use a spa until completely healed.
- Never use a spa when you are alone and never use a spa while using or after using alcohol or drugs that may cause sleepiness, drowsiness, or raise or lower blood pressure.
- Ask your city about any specific rules and regulations that apply to spa ownership, including local electrical codes.
- Do not allow unsafe or risky behavior in and around the spa.
- Consult with a licensed electrician for installation of or any work to your spa. If you are installing your own spa, it is your responsibility that all work performed complies with the National Electrical Code and all other applicable codes and regulations.
- Your spa's jets, grates, skimmer and main drain should be properly maintained and secured. Spa users should be instructed not to stick any part of their body into such outlets as entrapment and drowning can occur. Spa users with long hair should also be cautioned not to get their hair near such outlets.
- Keep a first aid kit in close proximity to your spa.
- Maintenance and safety manuals contain detailed tips and recommendations and should be read, followed and applied on a regular basis.
- We encourage all spa owners to request safety related publications from the Association of Pool and Spa Professionals (APSP), including: "The Sensible Way To Enjoy Your Spa or Hot Tub," and "Pool and Spa Emergency Procedures for Infants and Children." These APSP publications can be ordered from the APSP by calling or writing them at the APSP, 2111 Eisenhower Avenue, Suite 500, Alexandria, VA 22314, (703) 838-0083, or by visiting the APSP consumer Web site at www.theaps.org.

BUY WITH FULL CONFIDENCE AND PEACE OF MIND

The Guflsouth Spas line of spas has been designed, produced and perfected by our team in Tennessee for since 2010.

We are a family business of dedicated spa professionals offering lifetime factory service that supports its products, so that consumers can enjoy peace of mind and can take advantage of the lifelong health benefits of their spas.

Spas are technically challenging deluxe products which include amongst other things : plumbing, electricity, and electronics. All components have to face the outdoor elements and the variability of the seasons. You want to make certain that you are dealing with someone who is going to be around for a long time and who is dedicated with the service and upkeep of your spa, way after your date of purchase.

Our lifetime factory service ensures that we will always support you. We offer training to our authorized dealers and have a network of spa repair professionals throughout the United States for field service issues, on top of our expert inside team ready to support you and answer any questions.

We are proud of our 5-star quality program and our lifetime factory service support.

We value friendship and respect with our customers and live by the golden rule. We care about others, and we care about you.

Don't hesitate to email to us at anytime, it is always our pleasure to serve you:
